PRODUCT DESCRIPTION:
Pear flake powder is prepared from commercially grown pears, which have been washed, pureed, sieved thoroughly, drum dried and milled to the proper screen specifications. The product is inspected throughout the process to assure the product is in compliance with the provisions of the Federal Food, Drug and Cosmetic Act.

VARIETY:
A mix of northwest varieties will be supplied, primarily Bartlett variety

FLAVOR:
Typically bland

COLOR:
Tan to brown

MOISTURE:
3.5% maximum, Water Activity: 0.10 – 0.30

SIZE: **
8 Mesh: Thru USS #8: 90% Minimum; Thru a USS #30: 25% maximum
20 Mesh: Thru a USS #20: 90% Minimum
** Other mesh sizes available upon request.

AVAILABLE TREATMENTS:
Low Moisture pear flake powders are available with the following treatments:
Natural-No Treatment: No preservative, no special process
Contains Sulfites (to preserve color): Sodium Sulfite <300 ppm maximum
Calcium Stearate may be added at 0.5% maximum to prevent caking

PACKAGING:
Packaged in a 4.0 mil high density poly bag inside a corrugated box.

SHELF LIFE AND STORAGE RECOMMENDATIONS:
For the most up-to-date guidelines, please visit our website’s Resources section and select Regulatory Documents.

MICROBIOLOGICAL:
Standard Plate Count: 3,000/gm max
Yeast and Mold: 300/gm max
KOSHER CERTIFICATION:
This ingredient meets the kashruth requirements of the Union of Orthodox Jewish Congregations of America.

RECONSTITUTION RATIO:
Although the end usage, process, size and style of cut will ultimately dictate the correct ratio, evaporated pears generally require three (3) to five (5) parts water (by weight) to one (1) part pear, to fully reconstitute.
